LA NOSTRA STORIA
OUR HISTORY

Giacinto Rivadossi, originario di Lumezzane, inizia una piccola attività artigianale a Caino nel 1920 e nel 1922, a 27 anni, arriva ad Agnosine per costruire la sua officina. Lungo il torrente Bondaglio individua un vecchio mulino in vendita, lo acquista e, sfruttando l'acqua che da secoli faceva girare le pesanti macine, costruisce l'azienda di produzione di maniglie. Lo stabilimento viene inizialmente sistemato lungo il torrente, su un ripido burrone affossato sotto la chiesa parrocchiale; poi, col tempo, si estende sopra il torrente e nella roccia.
La storia di Rivadossi è un pò la storia della maniglia, che nel tempo passa da una lavorazione di tipo artigianale ad una produzione con tecnologie più avanzate. All'inizio degli anni Venti, la produzione avviene con fusioni in terra ed in conchiglia e i modelli che si ottengono sono massicci e di stile neoclassico; nel periodo postbellico della ricostruzione, la produzione si realizza con macchine automatiche per la pressofusione e nuove leghe. Intanto l'azienda si amplia ed assume, in campo nazionale sempre più rilievo; nasce una rete di agenti e rappresentanti, ancora oggi attivamente presenti e in alcune regioni di seconda generazione. Con la creazione del Mercato Comune Europeo e con la caduta delle barriere doganali si rende inevitabile accogliere le sfide della concorrenza internazionale. Nel 1965 si aprono due importanti mercati: la Francia e gli USA. La continua evoluzione delle linee architettoniche negli stili delle abitazioni coinvolge inevitabilmente anche la maniglia, come ogni altro componente d'arredo. I modelli di maniglie e coordinati che le accompagnano, quali pomoli, maniglioni, battenti, cerniere, coprinterruttori, catenacci, portabiti, nottolini, si accostano ai diversi stili di porte e finestre, con il colore caldo dell'ottone, la brillantezza del cromo, gli effetti delicati della satinatura. Accanto al pur ampio programma Rivadossi, la produzione è di oltre 1.000 articoli, nascono modelli firmati da architetti, che sono regolarmente brevettati.

Giacinto Rivadossi founded the company to which he gave his name in the far 1920 after the manner of the pioneers: an old mill, a waterfall from which he could get the electric power necessary to move the first machines in Agnosine. Where, at that time, there was only the electricity for the lighting.
The small concern developed rapidity due to the great entrepreneurial intuition and capacity of Mr. Giacinto Rivadossi involving with his own initiative all the inhabitants of the valley.
Rivadossi story is like the lever handle story, which is passed year by year from an handmade manufacturing to a technological process.
From the beginning of 20s, production process begins through send casting so the models result to be massive and show a neoclassic style.
In the postwar period of reconstruction the production is made with automatic machine for die casting and new alloys.
Meanwhile, the Company grows and takes on the national market more and more importance. Then created a network of agents and representatives that are still actively present. With the creation of the European Common Market and with the fall of customs barriers is inevitable face competition international challenges.
In 1965 there are two major markets: France and the USA.
The evolving on lines in the architectural styles of accommodation involving the lever handle inevitably, like any other furniture components.
Models and handles as coordinated accompanying knobs, pull handles, bolts and door hinges and goes to different styles of door and windows with the warm colour of brass, the brightness of chrome and the delicate effects of chrome satinated.
Beside the large Rivadossi program, the production is over 1000 items. So was born models signed by architects that had been regularly patented.
